

'Focus on qualitative researches'

DHARWAD, DHNS

Stating that the role of universities is crucial in the progress of the country, Legislative Council Chairman Basavaraj Horatti said that the universities should work beyond offering degrees and produce eminent researchers who can enrich the field of science and technology.

He noted this while speaking after inaugurating an international mathematics workshop organised by Pavate Institute of Mathematical Science at Dharwad Regional Science Centre.

Contribute to journals

Horatti said that the reputation and standard of the university depend on the research and qualitative articles published in inter-

national journals. The Karnataka University is blessed to have good teachers who have been a guiding force for the students to excel.

The students should take a cue from the lives of eminent researchers and mathematicians like Dr D C Pavate and come up with innovative research that could solve people's problem, he said.

KU Vice-Chancellor K B Gudasi said that the varsity has been roping in the services of renowned scholars and inviting them to the varsity to give lectures to the students on recent trends in research.

The students should think out of the box to compete globally, he added.

Prof Nijalingappa Matihai, Dr A Chennappa, Dr Aryakumar Chand, Prof N B Naduvinamani, Dr G Hariharan and others were present.

Legislative Council Chairman Basavaraj Horatti lights the lamp to inaugurate an international-level mathematics workshop organised at Dharwad Regional Science Centre. Prof H B Walikar, Prof K B Gudasi, and others are seen.
