## Preamble

# 1 Preamble

## 1.1 Karnataka – at a Glance

Karnataka today is at an inflection point. The economic fundamentals including State Gross Domestic Product, industrial growth, integration with the global economy and investment inflows are stable and growing. Now is the time to change gears and embark onto a path of radical strategic reforms to place Karnataka on the global value chain map.

Karnataka is the fourth largest and one of the fastest growing States in India with a INR 16,99,115 crore economy growing at around 10.00 per cent at current prices as per Economic Survey of Karnataka 2019-20. Karnataka has carved out a niche for itself in the global market as the knowledge and technology capital of the country. The State is spearheading the growth of Indian industry, particularly in the areas of electrical and electronics, information & communication technology (ICT), biotechnology, nanotechnology, pharmaceutical, aerospace and nano machinery 4.0.

The contribution of industry and manufacturing sector to Gross State Domestic Product (GSDP) stood at 22.01 per cent and 14.46 per cent during 2018-19 respectively. The State recorded INR 6,51,983 crore worth of exports in 2018-19, constituting 17.80 % of the country's export and the largest contributing sectors were software exports followed by engineering products, petroleum products, readymade, basic chemicals and pharmaceuticals.

Government has taken many initiatives to enhance its stature as one of the leading high-tech industrialized States in the country and is in the forefront of attracting investments from across the country and abroad in disruptive technologies viz. Artificial Intelligence, Automation, Data Analytics, Machine Learning, 3D Printing and Robotics, etc. As a result, the State ranks 1<sup>st</sup> in attracting investment intentions since 2016 and has attracted FDI of US\$ 37.67 billion during the period April 2000 to March 2019, constituting 9 per cent of the all India FDI.

### **'Futuristic Karnataka- where future is made'**

Karnataka is a land of immense opportunity and innovation. It is ideally positioned to make the future happen today. The State's manufacturing prowess is supported by critical enablers such as: thriving ecosystem, highly skilled and talented workforce, empowering institutional & policy environment; favourable business climate and robust infrastructure

**Robust Infrastructure to Support Industrial Growth:** Infrastructure is central to the State's effort to deliver inclusive and robust growth. With good rail, road and air connectivity, logistic support, and excellent tele-communication network the State's robust physical infrastructure has created a conducive environment for industrial development.

- i. **Industrial Infrastructure:** Infrastructure is central to the State's efforts to deliver inclusive and robust growth and Karnataka is already on the path of rapid industrial infrastructure expansion. Karnataka Industrial Area Development Board (KIADB) has developed 170 Industrial Areas spread over 82,289 acres across the State and has allotted to over 20,188 units. KIADB has also acquired 74,727 acres of land in favour of 483 units under SUC scheme. Karnataka Small Scale Industrial Development Corporation (KSSIDC) has allotted Industrial Sheds/ Plots to 13,793 units in its 190 industrial estates across the State. The State also has 38 Operational Special Economic Zones.

- ii. **Road network:** Karnataka is well-connected to its 5 neighbouring States and other parts of India through 0.24 million km of continuing road length. It boasts of 13 major National Highways.
- iii. **Rail network:** The Railway network in the State is under the jurisdiction of South-Western, South Central, Southern Central and Konkan Railway network. The Konkan Railways network connects various shoreline areas of the State. The State has a railway network of 3,250 km.

The Government has been taking steps to augment railway network in the State. Knowing the positive impact on economy, Karnataka is the first State to contribute for development of new railway lines. Karnataka intends have to bridge the gap in the railway network so as to provide easy transportation to raw materials and finished goods.

The following new rail lines are being developed in the State:

Tumkur – Chitradurga – Davangere (191.05 Kms), Tumkur – Rayadurga (207 Kms), Kadur- Chikkamagaluru –Belur- Hassan (66 Kms), Bagalkot – Kuduchi (142 Kms). Gadag – Wadi (257 Kms), Ginigera – Raichur (165 Kms), Shivamogga – Shikaripura – Ranebennur.

The State Government will consider requesting Ministry of Railways to construct new railway line between Bidar and Srirangapatna to boost the industrial development across the State.

Metro rail is a vital component of the transformation of the Urban Transport Scenario in Karnataka. Bengaluru Metro Rail Project Phase 1 is having a track length of 42.3 kms with 33.48 km of elevated section & 8.82 km of underground section. Phase 1 has two corridors, East – West corridor of 18.10 km long from Baiyappanahalli to Mysuru Road and North-South corridor of 24.20 kms from Nagasandra to Yelachenahalli. The entire Phase-1 project was completed in 2017 and it is in commercial operations. The Phase-2 of the Bengaluru Metro Rail project consists of four extensions two to the existing lines and two new lines. The total length of Phase-2 is 72.095 km with 61 stations (49 Elevated and 12 Underground).

M/S RITES has conducted a survey for providing suburban rail network to Bengaluru city and have submitted the Detailed project Report(DPR). This report has been accepted and forwarded to CCEA by Government of Karnataka and Ministry of Railways. Approval of CCEA is expected soon.

- iv. **Airports and Seaports:** Karnataka has five operational airports of which two are international airports located in Bengaluru and Mangaluru. Kempegowda International Airport in Bengaluru is the 3<sup>rd</sup> busiest airport in India and the country's first ever green field international airport conceived in PPP format. It is one of the largest airport in India built with modern technology and is ranked at the top internationally in terms of quality of service and user experience. It is also being expanded by operationalizing 2nd runway and indicating major efficiencies. The other operational airports are in Mysuru, Belagavi and Hubballi.

With a view to promoting regional air connectivity and to meet the requirement of creating and providing airport infrastructure in districts or locations which are not connected within the 150 km of the-existing airports, government is developing five minor airports at Shivamogga, Chikkamagalur, Kalaburagi, Hassan and Bidar.

Karnataka has one major port - New Mangaluru Port Trust (NMPT) catering to EXIM cargo movement and 10 other minor ports along its 300 km coastline. The New Mangaluru Port is the 9<sup>th</sup> largest port in India.

- v. **Power:** Karnataka is one of the leading states in the production of renewable energy in the country reaching 14,932 Mega Watts (MW) as of Feb 2020. It has the highest installed capacity of 7,299 MW of Solar Power. Government is developing world's largest solar park with an outlay of INR 14,000 Crore (US\$ 2 billion) and with a total capacity of 2050 MW at Pavagada, Tumakuru & has been commissioned.

**Skills Infrastructure:** Globally renowned for a talented and skilled workforce, Karnataka has been heralding a Skill Revolution. The State has the 4<sup>th</sup> largest skilled workforce in India and is home to several premier institutions. Government has undertaken significant reforms with increased public investment to ensure Access, Equity and Quality in Education. The State houses 234 engineering colleges, 44 universities, 16 international schools and 57 medical colleges.

Various skill development initiatives have been undertaken in consultation with the industry, for imparting training to students, unemployed as well as up-skilling/cross skilling for employed youth in various sectors such as ICT, BPO, Telecom, ESDM, Manufacturing, Services, Health, and Automation etc. The State boasts of 1,777 public and private ITIs providing skill training to 106,000 youth, around 290 polytechnics with seating capacity of 75,000 and under the Modular Employability Scheme 500 courses under 68 sectors is being implemented through 800 vocational training providers.

**Innovation Hub and Startup Ecosystem:** Karnataka is a powerhouse of innovation in India, with more than 400 R&D and innovation centers, largest number of technical & medical institutions and highest number of startups in Asia. The State is ranked as one of the top five R&D ecosystems of the world and the second-best ecosystem for startups. The State is recognized as the fountainhead of global research and development with multi-national companies having their global research and development centers here – perhaps the largest concentration of such centers anywhere in the world. Bengaluru was ranked 18<sup>th</sup> globally by Startup Genome Report 2019.

Under **Innovate Karnataka** initiative, Government provides financial support equivalent to INR 300 crore in the form of grant/equity through its various funds (KARSEMVEN Fund; KITVEN Fund; Startup Fund of Funds; IDEA2POC Fund; AVGC Venture Fund Bio Fund) to startups; micro and small enterprises in information technology, bio-technology and other manufacturing sectors in the next four years. Government has set up world class incubation centers and have established labs and common instrumentation facilities. Centers of Excellence in various sectors such as Aerospace & Defence, Data Science and Artificial Intelligence, IoT, Animation, Visual Effects, Gaming & Comics Sector, Cyber Security, Machine Intelligence & Robotics have been set up to drive innovation and entrepreneurship in the State of Karnataka.

**Ease of Doing Business:** First State in India to pioneer the EODB initiative by introducing the Karnataka Industries Facilitation Act in 2002. Government has made doing business easier and smarter by ensuring 98.64 percent compliance to provisions of Business Reforms Action Plan. Various initiatives in easing out the "Doing Business" in the State have been introduced. Through e-Udyami, the Single Window Portal of Karnataka, the approvals/ clearances, including renewals, can be sought from various line departments. In addition, all industry related services have been bought under the purview of SAKALA Act or time-bound rendition of services.

**Policy Initiatives:** Karnataka was the first state in the country to come out with the Industrial Policy in 1980. Since then it has come out with many progressive sectoral policies to give impetus to both conventional and new age industries. There are more than 20 policies for diverse sectors such as Aerospace and Defence, Biotechnology, IT, IT-enabled services, Innovation, Textiles, Agri-Business and Food Processing, Start-up, Tourism, Animation Visual Effects Gaming & Comics, Semi-Conductor, Renewable Energy, Solar, Infrastructure, Grape Processing and Wine, NRI and Electrical Vehicle & Energy Storage.

**Bengaluru's Rise on the Global Map:** Bengaluru, with a population of over 10 million is a key global industrial hub. The city is one of the fastest growing major metropolis in the country with an economic growth of 10.3 per cent and possesses world class infrastructure in housing, education & research. With a robust technology and innovation ecosystem in place, Bengaluru continues to be a leader in the establishment of knowledge-based industries such as information technology, biotechnology, engineering, etc.

- "Startup Capital of India" with the youngest tech workers- *only city in India to be ranked 18<sup>th</sup> among the top 20 startup ecosystem globally.*
- 4<sup>th</sup> largest Technology Cluster in the world after Silicon Valley, Boston, and London. *(United Nations)*
- Ranks as No.1 Digital City in the World as of November 2017 *(The Economist Group)*
- Only city in India to be ranked 19<sup>th</sup> among world's 25 Hi-Tech cities ahead of Berlin, Hong Kong and Shenzhen *(Research firm 2thinknow)*
- Topped the list of 22 tech cities across the world in Affordable Living *(Savills Tech Cities Index)*

## 1.2 Progress Achieved under 2014-2019 Policy Period

Government of Karnataka comes out with industrial policies at regular intervals of five years to ensure a well-balanced, sustainable and inclusive industrial development throughout the State. During the 2014-19 policy period, the State's achievement against the objectives is as under:

- i. Industrial growth rate stood at 10.72 per cent
- ii. Contribution of manufacturing sector to the State GDP in the year 2018-19 was 14.46 per cent
- iii. Attracted an investment of INR 3.73 Lakh crore including MSMEs investment of INR 40,132 crore
- iv. Created employment opportunities for 21.61 Lakh persons
- v. Created Single Window System for swift and hassle-free clearances

## 1.3 Need for New Industrial Policy 2020-25

The new industrial revolution presents new opportunities for industry, particularly manufacturing and manufacturing-related service industries. These developments are enabling smart manufacturing, customization, collaborative production and other new production modes and business models. Against this changing landscape, today, Karnataka is well-positioned to play a greater leadership role in the global arena with its new industrial policy framework to drive growth.

The focus of the New Industrial Policy 2020-25 is to build on the strengths of Karnataka's industry and to enable it to fulfill its role as the engine of growth and to shoulder responsibility of adding more hi-tech value and employment.

During formulation of the New Industrial Policy, several interactions and stakeholder consultations were held across the State wherein views, demands and suggestions of industry/industry associations on key areas have been received and intricately incorporated in the policy. The key areas that have been considered are:

- o **Global Value Chains (GVC):** This policy aims at placing Karnataka on the global manufacturing value chain. It recognizes the importance of the regional and global value chains for international trade. The policy focuses on enhancing State's involvement in Global Value Chains by creating the right eco-system.
- o **Industry 4.0:** Industry 4.0 revolution is dramatically changing the industrial landscape and tools such as data mining, data analytics, artificial intelligence, block chain technology, advanced robotics, etc. combined with Internet of Things (IoT) have emerged as game changers for industries. Government will endeavor to capitalize on the opportunities wrought by the Fourth Industrial Revolution through its new policy.
- o **Implementation of GST:** A unified GST has been a paradigm shift towards consumption based taxation. It reduces the cascading of taxes and leads to lower cost of production which ultimately increases the production levels. Introduction of GST provides an opportunity for the State Government to have a relook at its economic incentive framework and focus on production and employment based incentives to ensure an accelerated growth of manufacturing and industry.
- o **Regional and Balanced Development:** It is the prime responsibility of the State to ensure regional development and balanced distribution of investment within the State. To incentivize investments in industrially deprived regions, this policy has divided the entire State into zones by giving special focus to the backward regions. Tier II / III cities and Districts in North Karnataka including Kalyana Karnataka region would be given more incentives giving fillip to creation of enabling environment, development of infrastructure, equitable opportunities for the people of the region. This would give more opportunity to exploit the strengths and industrial prowess of North Karnataka for ensuring inclusive development of the State.

To unlock industry's high-growth potential across all manufacturing sectors with a greater thrust on Automobiles & Auto Components; Pharmaceuticals & Medical Devices; Engineering & Machine Tools; Knowledge Based Industries; Cement; Steel; Sugar; Logistics; Renewable Energy; Aerospace & Defence; Electric Vehicles; Healthcare & Wellness and Higher Education, Government is framing a comprehensive, focused, goal oriented industrial policy to profoundly change the entire manufacturing ecosystem and enable industry to fulfill its role as the engine of growth.

## **Policy Roadmap**

## 2 Policy Roadmap

### 2.1 Vision

To emerge as a global leader in Advanced Manufacturing, Research & Development, and Innovation and to create an ecosystem for an inclusive, balanced and sustainable development of the State.

### 2.2 Mission

To retain Karnataka's position as a global manufacturing hub and to achieve higher and sustainable industrial growth through capital infusion, technology transfer, world class industrial infrastructure, skill up-gradation and benchmarking of policies and practices to best global standards.

### 2.3 Objectives

- a) To attract investments worth INR 5 Lakh crore
- b) To create employment opportunities for 20 Lakh people
- c) To reach 3<sup>rd</sup> position in merchandise exports in the next five years
- d) To maintain an industrial growth rate of 10 per cent per annum
- e) To provide an enabling ecosystem for technology adoption and innovation

### 2.4 Strategies

Karnataka's current strength in international competition is largely based on the strength of its industry. As a pioneer in industrial development, Government of Karnataka aims to raise mid-to-long term growth potential through a commitment to innovative growth. This encompasses strategies in support of industrial infrastructure, innovation, the new industrial revolution and the digital economy.

- a) Promote sustainable, balanced and inclusive industrial growth.
- b) Enable employment generation and increase labour market flexibility through regulatory labour reforms.
- c) Create strategic tie-ups for the emergence of Karnataka as the Knowledge and R&D Hub
- d) Focus on development and promotion of the MSME Sector.
- e) Facilitate availability of industrial land.
- f) Promote Tier II / III cities of the State as engines of economic growth.
- g) Place Karnataka in the forefront of India's international trade.
- h) Showcase Karnataka as the "Factory of the Future"- Industry 4.0
- i) Engage with various stakeholders to develop sector specific skill development strategy

- j) Attract private investment in development of integrated/multi/sectoral industrial parks and flatted factories.
- k) Create an environment to enhance ease of doing business in the State
- l) Support for R&D & Technology Upgradation

## **2.5 Policy Period and Applicability**

This policy shall be valid for a period of five years from the date of issue of Government Order or till a new Policy is announced.

Incentives and concessions under this policy shall primarily be available only for Manufacturing Enterprises / Industries and specified categories of service enterprises as listed in Annexure 3.

03

## **Focus Sectors**

### **3 Focus Sectors**

Based on the competitive strengths and potential for growth this Policy has identified certain focus sectors viz. Automobiles & Auto Components; Pharmaceuticals & Medical Devices; Engineering & Machine Tools; Knowledge Based Industries; Cement; Steel; Sugar; Logistics; Renewable Energy; Aerospace & Defence; Electric Vehicles; Healthcare & Wellness, Higher Education and Bio-Fuels to drive economic development and create jobs across the State particularly in rural and remote areas.

#### **3.1 Automobiles and Auto Components**

Karnataka is the 4<sup>th</sup> largest automobile producing State in the country, contributing 8.5 per cent to the national output in the sector. It is home to 7 major OEMs viz. Toyota Kirloskar Motors Ltd., Volvo India Pvt. Ltd., Tata - Tata Marcopolo, Honda Motorcycles & Scooters, Mahindra Electric, Scania, TVS Motors and more than 50 auto component manufacturers. Karnataka is the hub for construction equipment in the country and is home to major manufacturers and exporters such as BEML, Volvo Construction Equipment, L&T Construction & Mining Machinery, Tata Hitachi etc.

Karnataka has a huge local market with more than 17.87 million registered vehicles in the State and connectivity to four of the top five automobile markets in the country, creating potential for automobile and component manufacturers to grow. Bengaluru retains 2<sup>nd</sup> position after Delhi with most vehicles on its roads.

With the focus of Government of India to gradually phase off Internal Combustion Engines, especially in the two wheeler and three wheeler sectors, the impact on the investments made by existing industry and the future investments in the sector needs to be assessed. In this direction, an industry group will be formed to study the needs of the sector, recommend corrective measures for the sustained growth of the sector in the State.

#### **3.2 Pharmaceuticals & Medical Devices**

The State currently ranks 5<sup>th</sup> in Pharma exports and contributes 10 per cent to the Indian Pharma revenue. Karnataka exports 40 per cent of its pharma produce. Presence of exclusive Pharma Special Economic Zone in Hassan, Pharma Industrial Areas and Research and Development Centres provide required impetus for further growth of Pharma sector in the State. Karnataka is home to 221 formulation units and 74 bulk drug units and has a well-developed research base with 35 Clinical Research Organizations (CROs) and 12 Adverse Drug Reaction Reporting Centres (ADR).

Government will establish a 'Pharma Park' at Mangaluru, Yadgiri, Nagamangala and Shivamogga that will give much needed fillip for manufacturers and woo the potential investors into the State.

Considering the huge cost involved in R&D activities in the sector, necessary support in the form of grants will be considered. To enhance the availability of skilled manpower specific to the sector, financial support in the form of grant for setting up of finishing schools along with stipend to students will be provided.

To encourage contract packaging or repackaging of tablets, capsules, creams, lotions in smaller containers, blister packaging etc., with or without ownership from original manufacturers, a practice prevailing in the industry, all such units will be eligible for incentives and concessions on par with manufacturing units.

The Medical Devices and Equipment industry is growing steadily over time due to the growing importance in health care. The domestic industry is relatively concentrated on less technology intensive and mostly include disposable and supplies end of the market. The market for diagnostic equipment like Magnetic Image Resonance (MRI), Ultra-sound machines (USGs), X-Ray machines, full body scanners etc., are mostly assembled in India and there is scope for indigenous manufacture of these devices.

A med-tech zone for medical devices manufacturing and innovation with comprehensive infrastructure facilities like common facilities, calibration, testing, quality control, waste management etc. will be established near Bengaluru.

### **3.3 Engineering & Machine Tools**

Karnataka is a leader in engineering and machine tools, home to one of the five identified foundry clusters in the country and specializes in manufacturing high value machinery. The State has a congenial ecosystem for engineering manufacturing with an Advanced Machine Tool Testing Facility (AMTTF), a State-of-art equipment facility at the Central Manufacturing Technology Institute(CMTI) in Bengaluru and presence of highly skilled workforce across the value chain of manufacturing owing to 1400+ ITIs, 200+ engineering colleges and 400+ R&D institutes.

Karnataka is a leading State in machine tools industry with Bengaluru alone producing 60 per cent (*in terms of value*) of the machine tools in the country. It is also the 2<sup>nd</sup> highest producer of Special Purpose Machinery and Heavy Electrical Machinery in the country. Karnataka being the hub for Machine Tool Industry offers enormous potential in the sector, India's first Integrated Machine Tool Industry Park - "*Tumakuru Machine Tool Park*" in Vasanthanarasapura, Tumakuru is set up jointly by Department of Heavy Industries, Government of India and Government of Karnataka. The park is spread over 530 acres with most modern infrastructure facilities and is expected to further enhance the leadership of Karnataka in the sector.

### **3.4 Knowledge Based Industries**

With a robust technology and innovation ecosystem in place, Karnataka continues to be a leader in the establishment of knowledge based industries such as information technology, biotechnology and engineering, etc. The State is recognized as the fountainhead of global research and development with over 400 multi-national companies having their global research and development Centres in Bengaluru including GE, GM, Intel, Texas Instruments, Motorola, SAP, Oracle, IBM etc. perhaps the largest concentration of such centres anywhere in the world. United Nations has ranked Bengaluru as the fourth largest technology cluster in the world after Silicon Valley, Boston, and London.

The incentives and concessions for knowledge based industries will be as per respective sectoral policies.

## 3.5 Core Sectors- Cement & Steel

### Cement

Karnataka is one of the top cement producing states and occupies 7<sup>th</sup> position in the cement production in the country. Lime stone is an essential raw material for cement production and the State has around 17,253 million tons of limestone deposits. The State produces more than 11 million tons of cement annually and contributes 6.51 per cent of the total cement manufactured in India. At present, the State has about 22 units of combined cement production capacity of around 16 MMTPA. Kalaburagi is one of the 7 cement clusters located in India.

### Steel

Karnataka, with its rich resources of iron ore, is one of the pillars of the national iron and steel industry. Districts such as Bellary, Chitradurga, Koppal and Tumakuru are the nerve-centres of the iron ore deposits in the State. Karnataka has an estimated 2 billion metric tonnes of iron ore and abundance of other minerals such lime stone, silica, manganese, etc. that are essential for production of steel. The State is extremely resource rich and hosts country's 74 per cent magnetite and 11 per cent hematite resources.

Karnataka contributed approx. 13.7 per cent of the total steel production in the country in FY 2017. The combined steel production capacity of 18 units in the State at present is around 22 MMTPA. Karnataka is amongst the few States to have a Dedicated Mineral Policy. The State is home to major steel plants such as JSW Steel, Kalyani Steels and Mukund Steels. JSW Steel's plant at Vijayanagar, Ballari in Karnataka is the largest single location steel producing facility in the country with a capacity of 12 MTPA.

## 3.6 Sugar

Karnataka is one of the top three sugarcane producing States in the country and stands 2<sup>nd</sup> with respect to sugar recovery after Maharashtra. The State accounts for approximately 8.9 per cent out of the total sugar production in the country. Sugarcane is grown in 16 districts of the State. Belagavi, Bagalkot, Bijapur, Mandya, Mysuru, Chamrajnagar and Bidar are the major sugarcane producing. Sugarcane production for harvest area of 4.00 Lakh hectares in 2018-19 is estimated to be 342 Lakh tonnes.

## 3.7 Logistics

Logistics, the backbone of economic activity determines how fast an economy can grow. The logistic support infrastructure has experienced a radical transformation in Karnataka due to significant development in infrastructure, power, road, water and the State's overall industrial ecosystem. Karnataka is well connected with 6,572 km of national highways, 19,578 km of State highways and 3,250 km of railways. Karnataka has one major port - New Mangaluru Port Trust (NMPT) and 10 other minor ports along its 300 km coastline. The State has Air Cargo facilities at Bengaluru and Mangaluru airports. There are 2 Inland Container Depots (ICD) facilities (at Bengaluru and Belagavi) and 7 Container Freight Station (CFS) facilities in the State. There are 11 cold storage facilities in the State operated by KAPPEC. Additionally, there are 194 private cold storage facilities established in the State under the central Government schemes.

Karnataka aims to enhance the State's stature as one of the leading logistic hubs in the country. Currently, Karnataka stands 4<sup>th</sup> among States that are leading logistic hubs in the country and the policy aims to bring it to the first position. The policy will look at promoting logistics infrastructure development by attracting private developers for development of (i) Multi Modal Logistics Parks (MMLP); (ii) Logistics Parks (iii) Dry Ports (iv) Cold Storages; (v) Warehouses; (vi) Truck Terminals and (vii) Free Trade Warehouse Zones (FTWZ).

### 3.8 Renewable Energy

Karnataka is the 7<sup>th</sup> largest State in generation capacity in India. The State is endowed with immense renewable energy potential viz. wind, hydro, solar, mini-hydel etc. Karnataka achieved the status as a leading State for renewable energy in India, reaching 14,932 Mega Watts (MW) as of Feb 2020. Several positive renewable energy policies such as hybrid wind solar development policy and significant steps to reverse Karnataka's historic reliance on energy imports has helped Karnataka emerge as a top State in installing renewable energy. Karnataka is the 1<sup>st</sup> southern State to notify its solar policy in 2011. Solar Policy for 2014-2021 aims at adding solar generation of minimum 6,000 MWs by 2021. Karnataka stands 1<sup>st</sup> in the world to setup 2,050 MW Solar Park at Pavagada taluk in Tumakuru district & has been commissioned.

All renewable energy projects viz., solar, wind, biomass and mini hydel projects are proposed to be treated as manufacturing industry and are eligible for incentives & concessions as applicable to manufacturing industries mentioned in this policy except Investment Promotion Subsidy.

### 3.9 Aerospace and Defence

Karnataka is one of the recognized hubs for Aerospace and Defence Equipment design and manufacturing. It accounts for more than 65 per cent of aerospace related investments in the country with 70 per cent of the supplier base and 67 per cent of all aircraft and helicopters manufacturing.

Bengaluru is India's largest Aerospace cluster, with companies like HAL, creating an ecosystem of parts, components and systems suppliers in the area. Presence of large number of Defence Services laboratories, makes Bengaluru-Karnataka an Aerospace & Defence Capital.

Today, several global aerospace majors, including Airbus, Boeing, Honeywell, UTC (Collins), GE and Rolls Royce have large engineering and R&D centres in Bengaluru. Government has set up country's first Centre for Excellence in Aerospace and Defence in partnership with Dassault Systems to provide high end training, skill development and industry-ready manpower.

The applicable incentives and concessions for promotion of industries in Aerospace and Defence sector will be as per **Karnataka Aerospace Policy 2013-23**.

### 3.10 Electric Vehicles

The future of the auto sector lies in electric mobility. Karnataka is the first State in the country to introduce a comprehensive and well-designed Electric Vehicle and Energy Storage Policy 2017 to provide bespoke policy ecosystem for this sector. Bengaluru is home to India's only electric car manufacturer, Mahindra Electric (Reva), and one of the most promising electric mobility start-ups, Ather Energy. India's first Public Electric Vehicle Charging Station is set up by BESCOM at Bengaluru and India's first-ever Electric Technology Manufacturing Hub is also set up in Bengaluru by Mahindra Electric Mobility.

The incentives and concessions for electric vehicles sector applicable to industries will be as per the **Karnataka Electric Vehicle and Energy Storage policy 2017**.

### 3.11 Healthcare and Wellness

India is expected to rank amongst the top 3 healthcare markets worldwide in terms of incremental growth by 2020. Indian wellness industry is estimated to grow at a CAGR of nearly 12 per cent for the next 5 years and is expected to reach INR 1.5 trillion by 2020. Karnataka has always given much priority to the healthcare sector over the years and is one of the first States to publish a State health policy way back in 2004, which is amended as **Karnataka Integrated Public Health Policy, 2017**. Karnataka has made substantial progress in building credible health infrastructure at different levels. The State has a wide institutional network providing health services both in urban and rural areas. There are 57 medical colleges; 52 ayurvedic colleges, 290 nursing colleges and 414 Government hospitals.

The wellness industry in Karnataka has sets itself apart from other destinations in the country. With an array of sculpted temples, scenic beaches, pleasant climate and other facilities, the State is a popular attraction for wellness tourism in the country. The AYUSH Department of the State is promoting Karnataka's traditional systems of medicine and wellness like Yoga, Ayurveda, Unani, Siddha, etc. to position the state as a unique destination for spiritual healing and wellness. Karnataka has several health and wellness centres specializing in conventional, alternative, complementary, herbal, etc. medicine. The State houses 661 Ayurveda, Yoga, Naturopathy, Unani, Siddha, Homoeopathy (AYUSH) health facilities.

### 3.12 Higher Education

The thriving knowledge-based industry of Karnataka is powered by the robust educational system and world-class education and research institutions. For maintaining the edge of Karnataka as the higher education hub, the State will focus on five strategic areas: access; equity; relevance; quality and excellence. Today, Karnataka's higher education sector is well positioned to cater to the fast-changing requirements of the 21<sup>st</sup> century in different sectors with 413 Government First Grade Colleges and 319 Private aided colleges affiliated to 14 State universities. The State also houses 545 institutes ranging from Degree to Diploma, Junior Technical Schools /Colleges. The types of Universities in Karnataka include: 24 State Sponsored Universities; 16 Deemed to be Universities; 2 Private Universities, 1 Central University and 3000 plus Undergraduate Colleges.

### 3.13 Bio Fuels

Bio-energy or Bio-fuel comprises bio-ethanol, biodiesel, compressed biogas (CBG) as the main fuels as well as aviation jet fuel, methanol, Dimethyl ether (DME), straight vegetable oils (SVOs) and bio-briquettes / pellets all made from biological sources like agri-residues, industrial solid & liquid wastes, municipal solid wastes (MSW), domestic sewage, tree-borne oilseeds (TBOs) and used cooking oil (UCO) etc.

Bio-energy sector in India is on the threshold of a take off stage. The investments made on the R&D in this sector all over the world in the millennium have yielded spectacular results and now a bouquet of technologies is available for commercial utilization. Karnataka has a strong agrarian base, has vast biomass resources of agricultural origin which can be gainfully utilized for generating bio-energy. The State is blessed with adequate quantities of agri-residues, techno-managerial capability to install, manage and run such facilities by way of competent manpower, availability of globally sourced technologies and a congenial work environment.

One of the crucial aspects of this bio-energy revolution is developing, managing and supplying bio-resources to these new industries efficiently as raw materials. This would result in a steady stream of alternative source of income for farmers and creation of jobs in rural areas.

04

**Promotion of  
Thrust Areas**

## 4 Promotion of Thrust Areas

To emerge as globally competitive with skill and scale that leverage hi-technology for growth, following thrust areas have been recognized.

### 4.1 Industry 4.0

The world of production is undergoing unprecedented transformation driven by the convergence of fourth industrial revolution technologies such as 3D printing, artificial intelligence, virtual and augmented reality, the internet of things and next-generation robotics providing opportunities for intelligent, flexible, customer-oriented production systems and new business models.

Industry 4.0 has the potential to transform the manufacturing sector of Karnataka. One of the major strengths in favour of Karnataka blending into the Industry 4.0 era is the State's IT services industry. Karnataka continues to house some of the world's largest IT companies. To leverage this further and catalyze Industry 4.0 adoption, the policy will focus on setting up a dynamic, competitive and world class Centre of Excellence for Industry 4.0.

The Centre of Excellence (CoE) will be set up in association with industry, industrial bodies, and research and academic institutes, having requisite capacity in building and running the centre. The State will play the role of a facilitator and will provide a grant of INR 100 crore for the State and regional Centres. The Centre of Excellence will focus on providing training, demonstration and dissemination of futuristic, emerging and advanced manufacturing and technologies in the domain of artificial intelligence, virtual and augmented reality, robotics for data analytics, modeling, simulation, and other related domains. The CoE will be in Bengaluru to begin with and will have Regional Centres across the State in a phased manner which will facilitate entrepreneurs to take advantage of this emerging technology, offer a pay-per-use facility.

Additionally, Government will also support institutional tie-ups, collaborations to develop Industry 4.0 capabilities and offerings, encourage training and skill building programs to explore latest technology solutions to create a deep integration of technology platforms and physical systems.

Eligible industrial units adopting Industry 4.0 technologies and processes will be granted additional fiscal assistance as mentioned in **Section 9** under **Table 9.6.2**.

### 4.2 Research & Development

Research and Development (R&D) plays a critical role in determining the productivity and economic growth of the State. Sustained investments in R&D helps in spurring economic growth and social development. There is a huge opportunity for the private sector to enhance its investments in the R&D sector in Karnataka as it provides access to technical competencies, diverse talent pool, cost savings and proactive Government support. Government aims to build an ecosystem supportive of advanced and smart manufacturing needs, with increased R&D partnerships with MNCs and other international players, and improved industry-academia linkages. The strengthening of R&D centers will facilitate innovative ideas, technology and products to boost the manufacturing sector in the State.

Bengaluru remains home to the highest number of R&D centres, Global Engineering Competence Centre (GECS), Business Process Management (BPM), and Business Process Management (BPM). Many Multi National Companies have their Global In-house Centers (GICs) in Bengaluru; the GICs play a strategic role in building internal innovation capabilities for the parent and act as innovation hotspots to foster and propagate the cultural shift to innovate & are perceived as an extended team of the parent or onshore organizations

India today has more than 1,500 GICs & collectively employs roughly 10 lakh people, being an important employment generator. About 35% of these GICs and 41% of employees are based out of Bengaluru. Global engineering R&D services outsourcing market is anticipated to reach more than USD 650 billion by 2025.

Government will support new R&D centers to boost sustainable growth of the manufacturing sector by way of financial assistance as mentioned in **Section 9** under **Table 9.6.1**.

### **4.3 Intellectual Property Rights (IPR)**

Government understands the need for a strong framework for nurturing a robust Intellectual Property (IP) ecosystem in the State that provides impetus to IP creation and bringing innovation to the market.

The policy provides for financial assistance as mentioned in **Section 9** under **Table 9.6.3** for creation of infrastructure to establish IP cells, Technology Transfer Centres (TTCs) and IP Promotion & Facilitation Hubs.

The State also aims at promoting Geographical Indicators (GI) as it has the highest number of registered GI's in the Country. It is proposed to map 'Centre of Excellence' and 'Successful Business Models' for the GI based product commercialization.

The support for GIs will be as per the **GI Policy** issued on 18/05/2019.

### **4.4 Technology Adoption & Innovation**

Karnataka is the forerunner of technological revolution and by building on its culture of innovation; this policy will incentivize adoption of modern technologies igniting a spark for innovation and entrepreneurship in the State, to make Karnataka a global go-to destination for innovation and technology.

Under the 'Technology Adoption' scheme industries will be incentivized as per **Section 9** under **Table 9.1.2**, to adopt new technologies and innovate by tapping into the growing stock of global knowledge and adapting it to local needs.

### **4.5 Cluster Development Initiatives**

Cluster development is increasingly recognized as sustainable, cost-effective and an inclusive strategy to ensure accelerated industrial growth. Clusters are potential drivers of enterprise development and innovation. Considering their importance, Government will continue to focus on cluster development approach.

#### 4.5.1 High Tech Clusters

New industrial clusters with plug and play facilities will be developed which will ensure better productivity, innovation and participation. Government will develop an ecosystem around the agglomerations through a 'Centre of Excellence' where the cluster approach will act as a powerful 'prism', encouraging networking among firms, businesses, and research providers, based on a set of technological competences

#### 4.5.2 District Industrial Cluster Development Program

A first of its kind initiative in the country has been taken up under 'product specific industrial cluster program' which aims at increasing the production capacities of the industries by creating product specific manufacturing clusters in the State. Through the program, nine industrial clusters have been identified, which is expected to create 9 Lakh job opportunities in the next nine years.

Further, keeping in view the overall industrial development in the State & based on the resources and skill sets available, the program is being extended to two more Districts viz., "Home and Personal Care Consumer Goods – FMCG Manufacturing Cluster in Dharwad and "Health & Wellness Cluster" in Shivamogga.

Sr. No	District	Product / Cluster
1	Kalaburagi	Solar Panels, inverters, capacitors, laminators etc.
2	Chitradurga	All kinds of LED lights
3	Hassan	Tiles, Sanitary wares & Bathroom fittings
4	Koppal	Toys & Mechanized toys
5	Mysuru	Integrated Circuit Boards (ICU)
6	Ballari	Textiles
7	Chikkaballapura	Mobile phone components
8	Tumakuru	Sports & fitness goods
9	Bidar	Agricultural implements
10	Dharwad	Home and Personal Care Consumer Goods – FMCG
11	Shivamogga	Health & Wellness

Special incentives and concessions are provided to Toys and Textile clusters. For other clusters, special incentives and concessions specific to respective product sector will be announced in due course of time.

#### 4.5.3 MSME Cluster Development:

Micro & Small Enterprises - Cluster Development Program (MSE-CDP) of Government of India aims to support the sustainability and growth of MSEs by addressing common issues such as improvement of technology, skills and quality, market access, access to capital, etc. Create/upgrade infrastructural facilities in the new/existing industrial areas/ clusters of MSEs, including setting up of Flatted Factory Complexes and common facility centres with an investment of INR 15.00 crore.

Karnataka Cluster Development Scheme (KCDS) aims to build capacity of MSMEs for common supportive action through formation of self-help groups, consortia, up gradation of associations, etc., create/upgrade infrastructural facilities in the new/existing industrial areas/ clusters of MSMEs and set up common facility centres (for testing, training center, raw material depot, effluent treatment, complementing production processes, etc.) with an investment up to Rs 10 crore.

## 4.6 Sustainability and Responsible Industrialization

Considering global warming and impending water crisis, this policy places significant thrust on adoption of greener, sustainable manufacturing practices.

The total annual demand for water for the industrial sector is estimated to increase more than three times, from 26 TMC in 2011 to 85 TMC by 2030, resulting in a 69 per cent water demand-supply gap by 2030. Closing this demand-supply gap through the reuse of secondary treated wastewater (STW) offers a sustainable, cost-effective and feasible solution. The total sewage treatment plant (STP) capacity in Karnataka is 1809 Million Liters per Day (MLD) in which Bengaluru STP Capacity is 1057 MLD and Non-Bengaluru STP capacity is 752 MLD. Policy will focus on ensuring long-term "water security" in the State by coming out with a comprehensive industrial water policy that will focus on recycle, conservation, and use of waste water. As per the **Karnataka Urban Waste Water Reuse Policy**, not less than 20 per cent secondary treated water (STW) is targeted, as a combined average across sectors, of total urban waste water generated for identified Karnataka Urban Centres by 2020, aligning with the national Service Level Benchmark and with the AMRUT program.

Government will encourage water harvesting in all its existing and new industrial areas, and facilitate setting up of effluent treatment plants and hazardous waste treatment plants in various industrial clusters. Financial assistance will be provided to encourage industries to adopt strategies to use sewage discharge, industrial discharge for industrial water security and to integrate systems that address environmental, health, and water pollution risks.

Many areas of Karnataka are facing problems of acute shortage of water supply, hampering industrial production. To encourage manufacturing enterprises to adopt water harvesting/conservation measures within their premises, financial incentives will be provided. Rainwater harvesting assures a more continuous and reliable access to water and is also environmental friendly, helping to recapture the base line for current water usage and reduction in dependence on ground water or supply from other water sources. To achieve pollution prevention & waste minimization at manufacturing enterprises, incentive will be extended to the 'Zero Discharge Process' enterprises.

The Financial incentives are as mentioned in **Section 9** under **Table 9.1.3**.

# **Promotion of Micro, Small and Medium Enterprises (MSMEs)**

## 5 Promotion of Micro, Small and Medium Enterprises (MSMEs)

Worldwide, the MSMEs have been accepted as engines of economic growth for promoting equitable development. MSMEs form an important and growing segment of Karnataka's industrial sector and occupy a place of prominence in the economy of Karnataka. Karnataka has the 5<sup>th</sup> largest MSME base in the country with over 7.16 million registered units employing nearly 4.94 million people. In view of its massive potential for employment, growth and exports and to ensure MSMEs remain globally competitive, the policy will focus on developing an ecosystem for the MSMEs to enable them to thrive, grow and succeed.

Following interventions are proposed for MSME promotion:

### 5.1 SARTHAK - Centre of Excellence for MSMEs

Despite the sector's significant contribution to the manufacturing sector, MSMEs have traditionally been facing several teething problems. These problems are spread across various functions such as production, technology, finance etc. Some of these challenges afflicting the MSMEs are:

- a) *High cost of funds leading to credit crunch for expansion;*
- b) *Inadequate exposure to global best practices and affordable production technologies;*
- c) *Poor marketing – leading to restricted access to markets;*
- d) *Lack of access to skilled and trained labour;*
- e) *Lack of access to quality raw material at reasonable price;*
- f) *Lack of access to Total Quality Management practices;*
- g) *There are many bottlenecks in accessing - right information, data analytics, branding, and quality control standards*

Although there are several tools and solutions pack available for each of these issues cited above, the problem continues to persist as the availability of the information is a big issue with the MSMEs. As a step towards addressing these issues, it is proposed to launch a new "MSME Sarthak" scheme that will create institutional mechanisms to address these key challenges faced by the MSMEs. The State will provide a grant of INR 50 crore for the CoE.

#### 5.1.1 Components of the Scheme

The scheme is proposed to be implemented through a two-fold mechanism:

- a) *Deploying an Online technology platform*
- b) *Establishing a Centre of Excellence (CoE) for managing the platform*

The details of the two levers of the scheme are provided below.

##### a) Deploying an Online Technology Platform

Under the ambit of the scheme, it is proposed to develop an online technology portal which will have modules targeted at addressing issues faced in specific areas by the MSME sector in Karnataka. The platform is proposed to be equipped with modular mechanisms & structures around Information, Facilitation, Regulatory, and Ease of Doing Business areas, which can help MSMEs efficiently bring their products to the market. The MSMEs will be free to take help of any module they like. Instead of creating new structures, the platform will plug onto the existing ones.

Key activities that the platform is expected to perform are:

- i. **Provide an integrated platform for raw material suppliers** – The platform will provide a one-stop shop for accessing quality raw material at an affordable price with linkages to e-Mandis, APMC, NCDX, ReMS, market-place aggregators like Udaan, and the elements of the logistic supply chain like warehouses, cold storage facilities, etc.
- ii. **Improve market access** – The platform will provide MSMEs with access to the retail market by on-boarding major brick & mortar and online marketplaces, Public Sector Undertakings, Government Departments, wholesalers, and retailers. This will help provide a one stop gateway to MSMEs for discovering a market for their products, generating supply chain efficiencies for the sector.
- iii. **Disseminate information on Quality Control standards and certifications** – The platform will provide MSMEs with updated and in-depth information on globally prevalent quality standards and certifications. The platform will leverage existing informational repositories of FSSAI, AGMARK, Organic Certification, etc.
- iv. **Enhance access to Credit** – The platform will integrate the conventional (Banks, NBFCs, MUDRA, etc.) and non-conventional (TReDS, PE/VCs, Funds of Funds etc.) sources of credit supply to MSMEs. The module will also integrate credit enhancement schemes with the financing agencies to provide access to low cost funds for MSMEs.

Going forward, the platform will address information asymmetry by leveraging data from sources such as GSTN, Income Tax, Credit Bureaus, Fraud Registry, etc., to improve the due diligence mechanisms of the credit suppliers and support the credit agencies in processing MSME loan proposals expeditiously.

- v. **Access to Data** – Access to analytics, market research, intelligence, CRM and other IT technology that helps to bring efficiency in operations would be created on the platform.
- vi. **Skill Development Programs** – The platform will have modules for dissemination of information pertaining to new-age skills emerging in different domains required by the MSMEs and will facilitate them in getting trained by collaborating with the public and private agencies delivering the skill development programs. Vide this module, Entrepreneurial Development Programs and domain-specific training would be provided to entrepreneurs in partnership with reputed institutes and trainers.
- vii. **Technology Adoption and Knowledge Transfer** – The platform will have modules for supporting MSMEs with the technicalities of transfer & adoption of new & emerging technology. Further, the platform will also build a repository of case studies, domain related best practices, etc. which may be adopted by MSMEs in their operations.
- viii. **Support MSMEs in Branding and Advertisement** – The platform will have modules which will support MSMEs in branding, marketing, and advertising related activities.

Through the above broad range of activities, the platform will address the issues and improve the competitiveness of MSMEs. The role of the Government will be that of a facilitator. The platform will bring together all the players involved in the supply chain and address the missing links.

## b) Establishing a Centre of Excellence for managing the platform setup

As its second lever, the scheme proposes to establish a dedicated institutional structure to manage the technology platform and provide strategic guidance to MSMEs in aspects such as technical know-how, managerial skill, filling up of the knowledge gap, etc.

The Centre of Excellence will identify gaps in the capabilities of the MSMEs and work with them in bridging the gaps, equipping them to adapt to the changing market & business environments. Further, the institutional mechanism will be equipped to assist rural enterprises in addressing issues faced in areas of GST, IT, UAM registration, PAN application, loan document preparation, etc.

The mandated activities for the Centre of Excellence are proposed to be aligned along following broad categories:

- i. **Technology Acceleration Programs and Practice:** This includes activities like promoting technology adoption by firms, providing business advisory services to firms aimed at improving their manufacturing techniques & processes, supporting transfer of technology, performing R&D related services, and facilitate access to technology through inter-firm partnerships.
- ii. **Connecting Firms:** Provide platforms for aggregation of firms from both ends of the supply chain – suppliers and consumers and act as an intermediary to provide support services, host best practice events to facilitate dissemination of information.
- iii. **Funding Assistance:** Providing firms with information on latest funding available for different functions - R&D, loans to scale business, fund joint pre-competitive research programs, funding for capital and operating infrastructure etc.
- iv. **Next Generation Manufacturing Technical Assistance:** Teach innovation & new product development skills to MSMEs, provide export assistance & training, provide energy efficient manufacturing skills, etc

It is proposed to build flexibility in the mandate of the Center of Excellence to adapt to the evolving nature of support required by MSMEs in the state – from “back end” support at the firm level aimed at improving their productivity to the “front end” services aimed at helping MSMEs in furthering innovation and R&D. To optimize the allocation of resources and gradually build-up the capabilities delivering agency from implementation point of view, it is proposed to expand the suite of services of the Center of Excellence in a planned manner. Initially the COE is expected to deliver this suite of services through partner organizations (“front end services”) such as IITs, IISc, Bureau of Indian Standards, international firms like ShinShiba, CME etc. while it continues to provide the “back end services” in terms of knowledge building and dissemination.

## 5.2 Infrastructure Support

- i. KIADB will earmark minimum 30% of allottable land in all their industrial areas for MSMEs. Out of which, KIADB will reserve 22.65% for SC/ST entrepreneurs, 10% for Minorities / Physically Challenged / Backward Classes (*Category 1 and 2A only*) / Ex-Servicemen entrepreneurs and 5% for women belonging to all categories in industrial areas.

KIADB will indicate 15% of the allottable land in industrial areas for MSMEs to be allotted by DLSWCC. The maximum extent of land to be allotted by DLSWCC would be two acres per project.

The minimum size of plot to be developed by KIADB will be 0.5 acre for MSMEs.

- ii. KIADB will construct multistoried / flatted factories with plug and produce facilities (*wherever feasible*) near Bengaluru, Mysuru, Hubballi-Dharwad, Mangaluru, Belagavi, Tumakuru and Kalaburagi. KIADB will provide these flats on monthly rental / lease basis.
- iii. KSSIDC will earmark entire allottable land in their industrial areas for MSMEs. Out of which, KSSIDC will reserve 22.65% for SC/ST entrepreneurs, 10% for Minorities / Physically Challenged / Backward Classes (*Category 1 and 2A only*) / Ex-Servicemen entrepreneurs and 5% for women belonging to all categories in industrial estates.
- iv. KSSIDC will be allotted land in KIADB industrial area, upon request for making industrial plots and sheds of smaller sizes for MSME sector. KIADB shall provide land to KSSIDC on absolute sale deed as per KIADB norms to enable KSSIDC to allot plots/sheds to the industry on lease-cum-sale deed.
- v. KSSIDC shall develop industrial estates exclusively for micro and small enterprises. The area to be procured will not be less than 50 acres. 20% of the allottable area will be reserved preferably for plug and play sheds out of which 10% of the area will be earmarked for multi storied sheds with plug and play facilities (*wherever feasible*) near Bengaluru, Mysuru, Hubballi-Dharwad, Mangaluru, Belagavi, Tumakuru and Kalaburagi. KSSIDC will provide these flats on lease / rental basis. Liberal FAR would be considered for flatted development/ industrial sheds /multi storied industrial units.
- vi. Development of Rural Industrial Areas exclusively for MSMEs in the impact area of industrial corridors will be undertaken along with infrastructure, like road connectivity, drainage system, street lighting, and water supply by KSSIDC. Rural industrial areas and estates will have minimum 100 to 150 plots measuring 2,000sq. ft. to 10,000 sq. ft. and will be developed in potential areas.
- vii. The maximum contract demand for LT consumers will be increased from present 67 HP to 100 HP.

## 5.3 Technology Up-gradation & Technical Support

- i. Under 'Sarthak' scheme, adoption, commercialization, transfer & upgradation of newer technologies by industries will be encouraged.
- ii. Specific emphasis would be given for collaborations with domestic/international research institutes/agencies and promote export oriented units.

- iii. Karnataka Council for Technological Up-gradation (KCTU) will run quarterly workshops and seminars for SME entrepreneurs to increase awareness for adoption of new technologies.
- iv. Quality improvement interventions by MSMEs such as up-gradation of existing technologies and installing of new technologies for quality control, cleaner environment friendly production, quality testing, and fee paid for quality certifications would be eligible for incentives as per **Section 9** under **Table 9.1.2**. This benefit would also be available to MSMEs who have already taken benefits under central Government schemes and would like to go for renewal.
- v. To extend Technical support to MSME sector, it is proposed to establish Technology Development Centres in association with Central Manufacturing Technology Institute and other such institutes in all key industrial zones in the State.

## 5.4 Enhanced Credit for MSMEs

Availability of credit at an affordable cost is critical for unlocking the potential of MSME sector and enabling them to scale up their operations. High cost of funds – in the range of 11% to 14% is a key factor impeding the growth of MSME sector. This limits the enterprise's ability to add value, upgrade technology, improve quality and implement modern management techniques.

Taking note of this, Government of Karnataka will create a credit enhancement scheme on pilot basis in collaboration with multilateral organizations /financial institutions /private funds with an objective to address the issue of expensive loans faced by the MSME sector. The scheme will aim at improving the credit risk profile of MSMEs, leading to reduction in interest rates.

## 5.5 Vendor Development and Facilitation

- i. To further strengthen the MSME ecosystem in the State and increase the competitiveness of the MSME sector, the policy will aim at promoting vendor development, management, facilitation and creating a platform to connect OEMs with MSMEs and identify vendors in terms of production capacity and quality standards.
- ii. Vendor Development Plans from the approved large and mega industries will be collated and taken forward by Director (MSME).
- iii. Director (MSME) in collaboration with the Industry will conduct a Vendor Development Event in the State annually to create collaboration opportunities for MSMEs by bringing together MSMEs and OEMs/Large Manufacturers/Public Sector Undertakings. Similar events at the District level will also be conducted.

## 5.6 Marketing Support in Public Procurement

- i. Goods manufactured by Micro & Small Enterprises located in the State will be allowed price preference of 15% against the Large & Medium Enterprises / Industries of the State and enterprises / industries of other States during Government Departments.
- ii. To enable wider dispersal of enterprises particularly in rural areas, the Government Departments & State owned PSUs shall procure 358 items from micro and small enterprises, which have been reserved for exclusive purchase from them as per Ministry of MSME, Government of India order S.O. 581 (E), dated 23.03.2012.

- iii. To reduce transaction cost of doing business, Micro & Small Enterprises registered with NSIC under a single point vendor registration scheme, shall be facilitated by providing them tender sets free of cost, exempting from payment of earnest money during purchases by all Government Departments and State owned PSUs.
- iv. KTPP rules will be amended as below to give fillip to Micro & Small Enterprises in Karnataka
  - In a tender where the tenderers are both from the State of Karnataka as well as from outside the State of Karnataka, the GST component shall be excluded for the evaluation of the price.
  - Preference shall be given to the Micro & Small Enterprises located within the State and registered with Department of Industries & Commerce in respect of those items for which UAM / Registration Certificate / Udyam Registration are issued.
  - Government Departments & State owned profitable PSUs shall procure 20 percent of goods from Micro and Small Enterprises located within the State. Out of this 4 percent of goods shall be procured from Micro and Small Enterprises promoted by SC / ST entrepreneurs as per the guidelines issued by Government of India.
- v. To incorporate the provisions of the Public Procurement (Preference to Make in India), Order 2017 for all enterprises as detailed in the order no. P-45021/2/2017/PP(B-II) dtd 15.06.2017 & its amendments of Department for Promotion of Industry & Internal Trade (DPIIT), Ministry of Commerce & Industry, Government of India in KTPP Act/Rules.

## 5.7 Skill Development & Entrepreneurship Development Program (EDP)

State Government recognizes the importance of skill and entrepreneurship development in driving economic progress, especially rural prosperity. To attain considerable growth and development in the Micro, Small and Medium Enterprises (MSME) sector skill development and entrepreneurship development programs and specialized training (*domain specific*) will be provided through the District Industries Centers (DICs) and from various other organizations through convergence.

- i. Rural Entrepreneurship Development Program will be implemented through district-level rural entrepreneur networks to foster entrepreneurship – in terms of motivation, mentoring, ideating and access to markets by private sector.
- ii. Director (MSME) will conduct District Level Incubation and Accelerator Programs. Incubators in potential taluks will be set up through PPP mode.

## 5.8 Support Services to Entrepreneurship and Livelihood Missions

Director (MSME) through Deputy Director (Khadi Village Industries) will co-ordinate and provide field level service support to skill entrepreneurship under livelihood mission programs in the State.

## 5.9 Zilla Panchayat Schemes

Director (MSME) shall revise, revamp and update / upgrade Zilla Panchayat schemes (*Artisans Cluster Development Programs which includes training, living-cum-work-shed, investment subsidy, exhibitions, study tours, interest subsidy and tool kits*) and any other such schemes in line with emerging industry trends and technologies.

## 5.10 Supports to Artisans

Artisans are skilled and make the products by hand. There are many crafts which represent Karnataka's rich cultural heritage but some are on a decline due to various economic and other factors. These crafts need to be preserved and protected through various interventions. These heritage crafts can also be modified or re-designed to meet the requirement of the present market demand and thereby preserving them. It is mainly a rural based sector which has its reach in backward areas.

There is a big potential as they hold the key for sustaining not only the existing set of artisans, but also for increasingly the number of new entrants in the crafts activity. This sector has suffered due to its unorganized nature along with additional constraints like lack of education, capital, and poor exposure to new technologies, absence of market intelligence and poor institutional framework. Therefore, it is proposed to put the sector on high growth trajectory as well as preserving existing cultural heritage:-

It is proposed to provide the following support for Artisans:

- i. Free training at NID and NIFT for selected trainers (Customized).
- ii. Training artisans with modern skills like e-marketing and information & communication technology.
- iii. Study tours for selected artisans across the country.
- iv. Stall rate concession at metro stations, airports, bus stands, railway stations, major star hotels across the State.
- v. Organizing an annual national level haat, a forum for artisans to exhibit and sell their products.

Additional fiscal incentives for Artisans are listed in **Table 9.1.1**

## 5.11 Dovetailing Government of India Schemes

- i. Schemes of Ministry of MSME and other Ministries of Government of India will be suitably dovetailed with schemes of Government of Karnataka for the benefit of MSME. Some of the major GOI schemes are listed in **Annexure 7**.
- ii. A separate cell under the Chairmanship of Additional Director (MSME), Department of Industries & Commerce will be set up for creating awareness, to co-ordinate & monitor implementation of Government of India Schemes/ Programs.

## 5.12 Ongoing supportive schemes / programs for development of MSMEs.

Commerce and Industries Department is implementing several schemes for growth of MSME that will continue to be implemented during the policy period. The list of ongoing supportive schemes / programs for development of MSMEs are listed in **Annexure 7**.

## 5.13 MSME Manufacturing Excellence Awards

Government will confer annual awards to MSMEs for achieving excellence / growth in manufacturing.

## 5.14 Equity Funding

SMEs in the core Manufacturing Sector lack support in long-term equity finances / early stage funding to ideas or concepts which are yet to establish the proof of concept in the real world. By identifying the right partners early on and using their potential effectively, manufacturing incumbents can benefit from the innovations of these pioneers.

The State Government will set up a Equity Fund exclusively for SMEs Manufacturing Sector initially with a corpus of Rs. 100 crore. 75 % of the corpus will be provided by Government and remaining funds will be contributed by financial institutions, private sector such as industries / private investors.

The fund will be managed by the Karnataka Asset Management Company.

## 5.15 Promotion of Design Clinics and Market Driven Interventions for Khadi and Handicrafts Sector

The Government proposes to establish a Design Clinic Service Center at State level and a coordinator at selected clusters to promote market driven interventions in handicraft and khadi sector, primarily focusing on design interventions initially. It intends to bring the handicraft and khadi sector and design expertise onto a common platform to provide expert advice and effective solutions on design problems resulting in continuous improvement and value addition for existing products. It will help in producing innovative product/s development and a competitive advantage to remain in business. Further, it aims to create an ecosystem in which creative producers can earn steady incomes through decent and equitable work, gain access to consistent demand for their products and thus lift themselves out of poverty and attain social empowerment. It further aims to address the neglected rights of producers at the sub-contractor level by using a hub-and-spoke model, where each producer, even in the smallest enterprise, is still willing and is a documented participant in a complaint value chain.

### Schemes with Financial Support:

#### i. Awareness and Promotion seminars & Workshops:

- *Awareness programs provide for a minimum of 30-50 members, at clusters with potential for development.*
- *INR 50,000 to a maximum of INR 1 lakh can be utilized for providing hall rent; sound system, mobilization and publicity at community level working, lunch / tea/ snacks and other miscellaneous expenses for conducting the program.*

#### ii. Diagnostic Study & Recommendations:

- *For a week-long study and submission of reports - not exceeding INR 1 lakh as study fee and all expenses including travel, board and lodge and in-field travel expenses.*
- *For a two-week study - not exceeding INR 2 lakh including Out of Pocket Expenses (OPE), travel, board and lodge and in-field travel expenses.*
- *For a three-week study - not exceeding INR 3 lakh including OPE, travel, board and lodge and in-field travel expenses.*

### iii. Design Interventions:

- a. This would be for the following beneficiaries:
- o Cluster level impacting at least 50 artisans.
  - o Enterprise of artisans group of at least 10 artisans.
  - o Micro enterprise of at least 3 artisans.
- b. Total budget cannot exceed INR 60,000 per artisan impacted including working capital, training, capacity building and design. It will include following:
- o **Design & Development:** Design & Development Fee not exceeding INR 10 lakh per cluster, INR 5 lakh for enterprise and INR 3 lakh for micro enterprises; prototyping and sampling costs including labour and material; training and capacity building.
  - o **Working Capital Intervention:** INR 50,000 per product/design will be provided as first intervention. Working capital per design / product for production of minimum 100 pieces of each design with maximum of INR 10 lakh will be provided as working capital assistance for each cluster; INR 5 lakh for enterprise level and INR 3 lakh for micro enterprise level. The sales proceeds of new designs will be utilized as revolving fund for the further production of the cluster group. Provided Return on Investment (RoI) on new sales generated by design inputs should be at least 4 X of design fees paid.
  - o **Modernization of Equipment:** To make new designs, modification of the existing machineries or change of existing machinery for developing new designs maybe required. Modification / equipment not exceeding INR 3 lakh per product may be considered. Decision will be made on the basis of returns on investment to the artisans. Where equipment is being considered for a common facilities centre benefiting the cluster, the budget considered may be higher, on a case to case basis.

## 5.16 Special Support to SC /ST Entrepreneurs

SC/ST entrepreneurs will be encouraged in establishment of enterprises and capacity building in Entrepreneurship.

- i. The existing support under the **Special Component Plan / Tribal Sub Plan Package** includes the following components:
- a) KIADB and KSSIDC to allot land / shed (A or B) at 75 percent subsidized cost or maximum of INR 200 lakh whichever is less in all zones. The concessional allotment of land / shed will be available to domicile SC/ST entrepreneurs only subject to a maximum of 2 acres / one shed (A or B) per family and subsequent allotments will be on prevailing rates of KIADB / KSSIDC. To avoid misuse of SCP / TSP funds, such land / shed (A or B) shall not be alienated for a period of 10 years from the date of execution of lease cum sale agreement. All other terms and conditions are as per Government Order No. CI 76 SS1 2019 dtd. 28/05/2020.
  - b) 90 per cent subsidy on the cost of KSSIDC 'D' and 'C' type sheds constructed and allotted to SC/ST entrepreneurs for Micro and Small Enterprises.
  - c) 60 per cent subsidy limited to INR 5.00 Lakh on bank loans availed by SC/ST entrepreneurs through financial institutions/banks/co-operative and rural regional banks (excluding co-operative financial associations) for setting up cottage and micro Enterprises.

### **6.1.3. Awareness for Export Promotion**

- i. All domestic events/workshops/B2B meetings being organized within the State/India among the exporters will be hosted on the VTPC website.
- ii. The District Industries Centre along with VTPC will tie up with regional offices of DGFT to conduct seminars on International Trade at various clusters in collaboration with active local trade bodies and associations.
- iii. State in collaboration with sector specific export promotion councils may create a portal to disseminate with respect to product-country wise standards and certification requirements.

### **6.1.4. Global Market Intelligence**

Global Market Intelligence reports will be prepared by VTPC in association with trade related associations/Export Promotion Councils/ FIEO to increase exports through geography-specific and product-specific strategies.

### **6.1.5. Town of Export Excellence**

Government will identify Town of Export Excellence (TEE) and proposals will be invited from recognized associations regarding export promotion projects for marketing, capacity building and technological services.

### **6.1.6. Export Awards**

The State will continue to confer the Annual Export Awards for export excellence in the State and encourage existing and new exporters.

### **6.1.7. Strategic Implementation Unit**

A Strategic Implementation Unit, which will act as an advisory body for export promotion, shall be constituted under the Chairmanship of the Commissioner for Industrial Development- State Export Commissioner for export related inter-departmental co-ordination and implementation of the strategy.

- iv. Government Tool & Training Centre (GTTC), CEDOK and other recognized institutions will be funded from the State budget to conduct the training programs. GTTC Tool Rooms will be set up across the State in potential Industrial Areas with active engagement of the industry.
- v. Entrepreneurship development and management programs, sector specific skilling programs, hands-on training, mentoring will be conducted by DICs to promote new generation entrepreneurs and start-ups.
- vi. Existing Artisan Training Institutes (ATIs) will be utilized on PPP mode for skill enhancement. Industry and industry associations will be encouraged to actively participate in designing curriculum and standards for skill training courses, depute their industry members as faculty and make shop floor available for practical training if required.
- vii. Support towards training cost for Artisans in recognized Artisan Clusters.

The incentives for skill development is detailed out in **Section 9** under **Table 9.5**

### **8.2.2.1 Institutional Frameworks**

A State Level Body would be constituted with members from industry, academia, Commissioner for ID and Director (MSME) and Skill Development, Entrepreneurship and Livelihood Department to co-ordinate the skill development and enhancement requirements of the industry. This body will also work to ensure quality training is imparted in various State training institutions.

## **Fiscal Incentives**

# 9 Fiscal Incentives

The vision statement of this policy is to create an ecosystem for an inclusive, balanced and sustainable development of the State. Focused effort is needed for dispersal of the industries to the industrially backward taluks to realize this vision. In order to create a strong industrial base with equitable allocation of funds and for overall development of the State, the taluks are grouped based on backwardness in industrial development and region with separate incentives and concessions in different zones as mentioned in Annexure 5.

## 9.1 Incentives and Concessions for MSMEs

MSMEs are the backbone of Karnataka's economy. They are the engine of incessant growth, both in terms of value addition and providing livelihood to millions of people and creating value for the entire community. MSMEs are the best placed to utilize local resources and create local entrepreneurship. Considering the critical role of this sector, Government will continue to strengthen and promote the MSME sector for achieving inclusive industrial growth and promoting employment generation. To keep the momentum of growth and to encourage holistic development of MSMEs the State Government will provide the following incentives and concessions.

**Ease of Doing  
Business**

## 10 Ease of Doing Business

Karnataka presents huge potential towards attracting investments across sectors with unique and investor friendly policies & schemes. Government is extremely proactive in improving the "Ease of Doing Business" climate in the State by introducing various initiatives. A series of administrative reforms have significantly improved the business sentiment in the State.

### 10.1 Simplifying Single Window Clearance Mechanism

Strong emphasis on 'Ease of Doing Business' has led to a transformational path for the State. Government has introduced various initiatives in easing out "Doing Business" in the State. Karnataka is the first State to bring out the Karnataka Industries (Facilitation) Act, 2002 and constituted the Single Window Clearance Mechanism at District Level and State Level for approvals of all investment proposals. Government has been successful in simplifying the procedures and fast tracking the approvals along with providing effective investor facilitation for the investors to invest in Karnataka through the single window system. The major Ease of Doing Business initiatives implemented by the Government are listed in Annexure 9.

#### 10.1.1. Integrated Digital Single Window System

With an aim to make 'doing business easier and smarter', Government of Karnataka has restructured its single window system to increase transparency and efficiency of the Government regulatory functions and services and to reduce regulatory hurdles. The existing e-Udyami module is being upgraded to an "integrated digital single window system" which will act as the single touch point facilitating the required approvals from the concerned departments/ agencies. The end to end integrated digital system mechanism would consider the following aspects: investor facilitation; integration with line departments; efficient monitoring mechanism from investor and department perspective and robust grievance redressal system.

The remodeled integrated digital single window system in Karnataka would consist of the following:

- i. Common Application Form (CAF)
- ii. Online approval based on Investor profile and CAF
- iii. Integration of KUM website with other departmental websites
- iv. Effective and user-friendly screen navigations to enable quick and faster extraction of data
- v. Platform independent application and digital signatures
- vi. Document management system for both applicant and officials for storage and dissemination
- vii. Centralized application tracking for online services
- viii. Comprehensive MIS reports/Dashboard
- ix. Query management and grievances redressal mechanism

Karnataka Udyoga Mitra (KUM) will be broad based in line with the above.

## **10.2 Simplification of regulatory processes & procedures**

Amid the changing landscape of doing business in Karnataka, the State's regulatory landscape for business is a key pre-requisite for facilitating investments through fast track mode in the State. Simplification and re-engineering of regulatory processes and procedures will be undertaken by Government to reduce time & cost of compliance to Government procedures for industrial investments.

### **10.2.1.Process Re-engineering for Effective Implementation**

Government has implemented various reforms across departments to simplify and streamline the regulatory processes and procedures. The major department wise reforms implemented to ease 'doing business' in the State is listed in Annexure 9. Government will further amend its regulatory framework where procedural impediments at the entry and implementation level will be removed along with reducing maintenance and submission of repetitive documents during the operational level.

#### **10.2.1.1 Karnataka Industries (Facilitation) Act 2002**

Facilitation to the industry has been the prime focus in Karnataka. The State introduced "*The Karnataka Industries (Facilitation) Act, 2002*" to facilitate new investments and simplify the regulatory framework. Further requisite amendments in the Act have been made for the manufacturing enterprises for exemption of certain approvals for setting up of industry for an initial period of 3 years.

**10.2.1.2 Trade Licenses-** Auto-renewal for trade licenses will be introduced under The Karnataka Municipal Corporation Act, 1976 & The Karnataka Municipalities Act, 1964. Necessary circular no RDPR 481 RPR 2016 dtd 27/02/2018 has already been issued that no renewal is required under The Karnataka Panchayat Raj Act, 1993.

**10.2.1.3 Uniform Property Tax Guidelines-** Rural Development and Panchayat Raj Department will evolve uniform guidelines to fix property tax, development cess, etc. for industrial units in industrial areas / estates.

**10.2.1.4 Property Tax Slab-** Government shall propose a separate property tax slab for industries.

### **10.2.2.Document Management System**

Government is in the process of rationalizing the documents required for getting various approvals by creating a Document Management System (DMS). In the upgraded system there would be a "Digi-Locker" for each applicant which would act as a document repository for all the approvals, documents and other details of the applicants. The DMS will have system based checks and balances which will allow the investor to upload the documents only once in a lifecycle hence avoiding uploading of the same document repeatedly. There would also be a provision for retrieving the documents.

### **10.2.3.Reduction of Timelines**

All the requisite services are now under the purview of SAKALA to ensure the timelines are being followed. In addition, these timelines are being reviewed for further reduction.

# Administration of the Policy

## 11 Administration of the Policy

### 11.1 Review and Monitoring Committee

A High-Level Review and Monitoring Committee under the Chairmanship of ACS/Principal Secretary to Government, Commerce and Industries Department with ACS/Principal Secretaries/Secretaries of line departments will be constituted to monitor the progress of implementation of all the provisions of the policy regularly. This Committee will ensure timely issue of enabling Government Orders by various departments in relation to the policy. The Committee will put in place a suitable mechanism that ensures speed and transparency for disbursement of incentives. The Committee will recommend mid-course corrections, if any, for smooth implementation of the Policy. The Committee will also bring out half yearly reports indicating the progress in implementation of the Policy.

This Committee will be assisted by a Policy Implementation Cell headed by Commissioner (ID) and members such as Director (MSME), Additional Director (P&P) (Member Convener), two representatives from State Level Industrial Associations (President) and one representative from National Level Industrial Association (President). This cell will have requisite staff and resources to conduct research, undertake studies, surveys, etc. & to assess impact of policy initiatives and provide relevant feedback regarding the policy and its implementation.

### 11.2 State Level Co-ordination Committee (SLCC)

A State Level Co-ordination Committee (SLCC) under the Chairmanship of ACS/Principal Secretary to Government, Commerce and Industries Department and Commissioner (ID) as the Member Convener and line department officers as members will be constituted to address any ambiguity that arises in the New Industrial Policy, it shall be the authority to interpret the policy measures, incentives & concessions detailed in this policy (*including those in previous policies wherever applicable*) and its decision shall be final.

Separate operational guidelines for administration of these incentives and concessions will be issued for the guidance of the concerned agencies and officers with the approval of the State Level Coordination Committee.
