9. Computerisation:

The proposal has been submitted to the government on Dated:25.11.2011 to take up the computerization of this office as under.

DIGITIZATION, SCANNING AND CATALOGUING AND INDEXING

Digitization and scanning are two very different processes. While scanning essentially takes a picture of a document and makes it available on a disc for storage or for printing, digitization stores the information contained in a document, picture of a sound file and makes it available in any type format of your choosing.

With this in mind you will need to plan your project for the type of service that you need, especially if you are planning to engage a provider to do the job for you. Some companies charge for their time and materials while others charge per item plus materials. The more organized you are, the quicker the project will be done and the less it might cost you

Digitization of Old Files/Books in to digital format, so that viewers can find easily and the documents in computers screen and whenever they required data or printouts can take easily.

DMS (Document Management System):

DMS is an Enterprise Document Management Solution that helps organizations across verticals to manage lifecycle of any type of electronic documents. DMS provides a unique repository for storing, retrieving, organizing and routing of electronic documents.

As per Govrnment letter no:KMDS:CR:9:20 08-09, Dated:23-11-2011 a sum of Rs.7,00,000-00 has been paid at the end of 2015-16, Karnataka Municipal Data Society, Bangalore and the amout is also sent to the MDS for documentation.

DMS intergrates diverse data transacted across the organization with ease. DMS's superior technology intergrates configurable workflows and embeds document management ensuring that documents in all forms are digitized, indexed, archived, search enabled and globally accessible.

IT is one of the software, contains easily recognize files or particulars Papers to be retrieved in a seconds, so that viewers can easily find papers or files or books or amenedments, proceedings or anything indexed papers can view in a seconds. A sum of Rs.0.50 lakhs has been paid dated 22-02-2016 as annual subscription.

Enterprise Resource Planning (ERP)

Enterprise resource planning (ERP) integrates internal and external management information across an entire organization, embracing finance/accounting , manufacturing, sales and service, customer relationship management, etc., ERP systems automate this activity with an integrated software application. Its purpose is to facilitate the flow of information between all business functions inside the boundaries of the organization and manage the connections to outside stakeholders (IT IS PAPERLESS OFFICE)

ERP systems can run on a variety of hardware and network configurations, typically employing a database as a repository for information.

ERP Systems typically include the following characteristics:

- ♦ An integrated system that operates in real time (or next to real time), without relying on periodic updates.
- ♦ A common database, which supports all applications.
- ♦ A consistent looks and feels throughout each module.
- ♦ Installation of the system without elaborate application/data integration by the Information Technology (IT) department.

10. Details of Court Cases:
